

Note: When using this schedule for game additions within a quarter make sure the number of games equals the total number of games you are licensing. For example; if you have 10 games and you want to add one more, you would pay \$625 since you are going from 10 games at \$750 to 11 games at \$1,375. (1,375-750=625)

**NGC-15 Quarterly Fees**
