TO: ALL LICENSED MANUFACTURERS AND INTERESTED PERSONS

SUBJECT: TECHNICAL STANDARD 1.080 REVISION FOR SYSTEM BASED GAMING

In light of technological advances in slot machine capabilities, the Board has developed a draft set of regulations describing basic system architecture and other technical requirements for system based and system supported gaming devices. This set of draft technical standards attempts to create a foundation upon which other regulations and technical standards, that address this new form of gaming device, may be laid.

The Board will be accepting comments and suggestions for changes to these draft technical standards until August 1, 2004. The draft technical standards will be available for review or download on the Gaming Control Board's web site at <http://gaming.nv.gov> or a hard copy will be available by direct mail if requested.

Questions regarding these draft technical standards as well as suggestions and change language should be directed to Marc McDermott of the Board's Electronic Services division in Las Vegas.

Sincerely,

Scott Scherer,
Board Member
