SUBJECT: PROPOSED CHANGES TO TECHNICAL STANDARDS

In light of technological advances in slot machine capabilities, the Board has developed a draft set of technical standards describing basic system architecture and other technical requirements for system based and system supported gaming devices. This is the second draft of these technical standards and it incorporates industry comments and suggestions received as a result of the initial draft. Additionally, a new section for a Universal Download Server has been included to provide another acceptable means of achieving more configuration flexibility on the casino floor.

The Board will be accepting comments and suggestions for changes to these draft technical standards until March 1, 2005. The draft technical standards will be available for review or download on the Gaming Control Board's website at <http://gaming.nv.gov> or a hard copy will be available by direct mail if requested. Depending on the number and content of the comments received, the Board may develop another draft or may schedule a public workshop to discuss any final changes necessary prior to noticing these Technical Standards changes on a Board agenda.

Questions regarding these draft technical standards as well as suggestions and changes to the language should be directed to Marc McDermott of the Board's Electronic Services division in Las Vegas at (702) 486-2043.

Sincerely,

Dennis K. Neilander
Chairman
