**SUBJECT: PROPOSED AMENDMENTS TO REGULATION 6.150 AND THE BANKROLL FORMULA**

The Gaming Control Board's Audit Division has drafted proposed changes to Regulation 6.150 and the bankroll formula. Before being submitted to the full Gaming Control Board and Nevada Gaming Commission for consideration, we are interested in gaming industry input.

The bankroll formula was last updated in November 1990. Changes in the industry over the last 15 years warrant updating of the formula and the instructions. The following are just a few of the proposed major changes from the current formula:

- The 30-day requirement will no longer be computed.
- Computation of the bankroll requirement will be made in three tiers:
  1. One percent of gross gaming revenue to be maintained at all times;
  2. Per game, per machine requirements scaled to gross gaming revenue; and
  3. Variable requirement.
- A portion of the casino bankroll must be maintained on hand; the remainder must be available by the end of the next business day.

The proposed amendments to Regulation 6.150 and the proposed revised formula, instructions and worksheets are available on the Gaming Control Board's website at <http://gaming.nv.gov>. We are asking that interested parties apply the bankroll formula computations to their respective properties prior to attending one of the workshops to better identify possible questions and concerns. To ensure some consistency, we are asking that computations be run as of June 8, 2005. The worksheet is in electronic format and should be downloaded from the site and completed. Most computations are automated.

Workshops will be held as follows:
