NOTICE

Notice # 2015-14

Issuing Division: Technology

DATE: March 25, 2015

TO: Public, All Licensees, and Interested Parties

FROM: A.G. Burnett, Chairman 

SUBJECT: Preliminary Technical Compliance Reviews

To facilitate the efficient entry of gaming products into Nevada and to enhance the communication between the Innovator, the Gaming Control Board, and the Independent Test Lab (ITL), applicants for a manufacturer's license may begin the conceptual and technical review of their product(s) with the Board for compliance prior to the applicant receiving a manufacturer's license.

In order to begin the process, the applicant must have a complete application on file with the Board's Investigations Division and have fully funded their investigative account in accordance with NGC Regulation 4.070. A separate account with the Technology Division may be required to fund the product compliance review.

The process should flow as follows:

1. Complete application for licensure as a manufacturer and fund investigative account.
2. Consultation between the Applicant and the GCB
Technology Division staff will work directly with the applicant to review the use and implementation of their product to address potential regulatory compliance concerns prior to significant product development, ITL certification, or submission to the Board for approval.

3. Pre-approval Certification by an ITL

All gaming devices and gaming associated equipment must be submitted to an ITL for testing and certification prior to submission to the GCB for final approval.

4. Submission to the GCB for final approval

Final product approval cannot be granted until the applicant has received a manufacturer's license.

Questions should be directed to Technology Division Lab Manager Jeremy Eberwein at jeberwein@gcb.nv.gov or Chief Jim Barbee at jbarbee@gcb.nv.gov.
