

**21+3 Progressive – Version 5  
Rules of Play**

**Game Description**

21+3 Progressive – Version 5 is an optional progressive wager for standard Blackjack and Blackjack-variant games and can be played with 1, 2, 3, 4, 5, 6, or 8 standard, 52-card decks. The object of 21+3 Progressive is for the three-card hand, formed from the player's first two cards and the dealer's up-card, to match a poker hand listed on the corresponding paytables. The outcome of the 21+3 Progressive is not dependent on the base game's outcome.

**Rules of Play**

1. To begin each round, players must place a standard base game wager and may also place an optional 21+3 Progressive wager.
2. After all wagers have been placed, two cards are dealt to each player, face-up, and two cards are dealt to the dealer, one face-up and one face-down, as per standard blackjack dealing procedures.
3. The dealer then follows house procedures to reconcile the 21+3 Progressive wagers.
4. The primary game is now played to completion.

**Dynamic Pays**

Each round one to three of the four fixed-pay hands will be randomly selected to be dynamically adjusted to an amount higher than the original/default pay. The number of hands with dynamic pays is chosen uniformly at random from one to three. Then, fixed-pay hands are chosen uniformly at random without replacement from the four. Each selected fixed-pay hand has 10 Dynamic Pays that are randomly selected in place of the original/default pay for that round. Each of the 10 Dynamic pays, per hand, has an equal chance of being selected. After each round, all Dynamic Pays are reset to the original amount until the process is repeated. Only the highest-ranking hand is paid out to players, even if a higher-paying, but lower ranking hand can be achieved. For example, if a player has a straight flush, but a three-of-kind pays more because of the Dynamic increase, they will still only receive the straight flush pay.

**Notes**

1. All pays are “for 1.” The progressive wager is not returned.
2. Only the highest qualifying hand is paid.
3. 100% awards are based on a *Three-of-a-Kind* in the specific rank(s) based on the corresponding payable.
4. In paytables configured with a reserve meter, the initial seed amount does not affect long-term house edge and is left to the operator’s discretion.
5. Each round, 1-3 of the fixed-pay hands will change to 1 of the 10 *Dynamic Pay* multiplier options available for that hand. The pays will reset and the process will repeat each round.
6. The paytables are based on a \$1 wager. If the progressive is configured with a different base wager amount, the seed/reseed, pays, and *Dynamic Pays* should be multiplied accordingly.
