

Dealer Breakz Blackjack

Rules of Play

Dealer Breakz Blackjack is the addition of a side bet to a normal blackjack game with two, four, six, or eight standard 52-card decks. It wins when the dealer's hand ends with more than 21 (bust) and loses when the dealer's hand ends with no more than 21, when played with the standard house rules. The side bet is active even if the player busts or has a blackjack, and is not resolved until the dealer's hand is finished. If any player has placed a Dealer Breakz Blackjack side bet, then the dealer must play their hand to completion, even if all players have either blackjacks or busted. The dealer hits as long as their total is less than 17, either hits or stands if the total is a soft 17, according to house rules, and stands if the total is greater than 17 or is a hard 17. The amount won by the side bet is generally greater when more cards are dealt to the dealer's hand before it busts. Paytable 13 also has an extra "Dealer Envy" bet, enabled at the discretion of the operator. If the side bet is at least \$5.00 and the dealer's hand takes at least four cards to bust, the dealer receives the amount specified on the paytable. The amount is not scaled to the bet placed. If the dealer stands with no more than 21, or busts with only three cards, the dealer envy award is \$0.00. The Dealer Envy feature, when enabled, has no impact on the RTP for the Dealer Breakz side bet.

The side bet must be made before any cards are dealt, and are noted in a separate area of the table. The cards are dealt as per the regular house rules to the players and dealer. Each player in turn decides how to play their hand, given the available house options. If any player has placed the Dealer Breakz Blackjack side bet, then their cards will not be collected, but placed under the Dealer Breakz Blackjack side bet, until the side bet is resolved.
