

## ***Fixed Jackpot add on for Bonus Spin Xtreme and Bonus Spin Xtreme Power Up Rules and Procedures***

*Fixed Jackpot Prize Add-On for Bonus Spin Xtreme and Bonus Spin Xtreme Power Up* is an optional add-on intended to be used with existing AGS Bonus Spin Xtreme and Bonus Spin Xtreme Power Up triggers.

- It may be configured with AGS Poker-style games that have a Bonus Spin Xtreme wager and utilize a single standard deck of 52 cards or a 53-card deck consisting of a single standard deck with a single Joker, where each player has their own hand either entirely made up of their own cards or a mix of their own cards and community cards.
- It may also be configured with AGS Blackjack games that have a Bonus Spin Xtreme wager and utilize 1, 2, 4, 6, or 8 standard decks of 52 cards.
- The Fixed Jackpot Prize is an add-on to the existing Bonus Spin Xtreme wager, no additional wagering is required to qualify.

To configure the Fixed Jackpot Prize with Poker style games, the base game should not have any strategy elements that allow the player to manipulate how cards are dealt. For example, a game that allows players to discard and draw additional cards should not be configured with this add-on.

The following AGS Poker Game Paytables can be configured with the following Configurations:

- Dealer Open Pai Gow
  - 7 Card Straight Flush with Joker A and B (Player's Hand)
  - 7 Card Straight Flush without Joker A and B (Player's Hand)
- Jackpot Hold'em
  - 5 Card Royal Flush A and B (Players 2 dealt cards and the flop)
  - 4 Aces (Players 2 dealt cards and the flop)
- Criss Cross Poker

- Top Flush (Tioli Game)
  - 7 Card Straight Flush (Player's Hand)

## ***Fixed Jackpot add on for Bonus Spin Xtreme and Bonus Spin Xtreme Power Up Rules and Procedures***

To configure the Fixed Jackpot Prize with Blackjack games:

- The dealer must reveal their face-down card, or play out their hand to deal their second card if they do not deal a face-down card to themselves initially, even if all players bust or have a natural Blackjack.
- In Super 4 Royal outcomes, the Ace must be one of the dealer’s two cards.
- Mini Royal outcomes are evaluated based only on the player’s two initial cards and the dealer’s face up card.
- Mini Royal and Triple Seven outcomes are evaluated based on the players 2 initial cards and the dealer’s face up card.

The operator may also optionally add a “10% of Meter” award to Poker style games and Blackjack games configured with certain triggers, where 10% of the current meter will be awarded to a qualifying hand.

- Blackjack games configured with a BJ Match (matching suited Ace-King BJ) trigger, the 10% of Meter award will occur on a BJ Match with any other suited cards (suited Ace-Ten/Ace-Jack/Ace-Queen).
- Triple Seven of Diamonds configuration, the 10% of Meter award is a suited Triple Seven from any of the other suits.
- Triple Seven Suited configuration, the 10% of meter award is a Triple Seven with all the same color.
- Mini Royal (Ace- King-Queen Suited, specific suit) configurations, the 10% of Meter award is a Mini Royal (Ace-King-Queen Suited) of any suit other than the one specified for the 100% of Meter trigger.

After all wagers have been placed, the value of the Fixed Jackpot Prize is incremented based on the configured increment rate and the total value of all progressive wagers. After the new value of the progressive meter is calculated, if a player who has placed the progressive side wager achieves the configured winning hand, the Fixed Jackpot Prize is awarded. If multiple players at a table qualify for the Fixed Jackpot Prize at the same time, the operator may decide how to award the progressive pay amongst those players prior to opening the table.
