

## **Mega Fire Blaze Roulette Rules of Play**

### **Game Description**

Mega Fire Blaze Roulette Live is a variation of a standard Roulette game, that uses standard European Roulette rules, and includes a bonus feature. Mega Fire Blaze Roulette Live uses a live dealer and a physical table-top single zero Roulette wheel, which consists of 37 slots, numbered from 1 to 36, plus a Zero (0). This game also has a Mega Fire Blaze Bonus feature, for which only some wagers are eligible.

### **Rules of Play**

Every spin, 1, 2, 3, 4 or 5 numbers are randomly chosen from all the numbers on the wheel (0–36). These become the fire numbers: their betting map positions are encircled with a fire border. Occasionally, the Fire Blast event takes place and creates 10 random fire numbers. If the ball lands on the fire number, your Straight Up, Split, Street, Corner/Basket or Line bet(s) (“eligible bets”) placed on that number make you eligible for the Mega Fire Blaze Bonus game. If you did not place an eligible bet, you join the bonus game as a watcher.

#### **Mega Fire Blaze Bonus Game:**

The Mega Fire Blaze Bonus feature is triggered when the ball lands in a designated fire spot for eligible wagers. The bonus game grid is displayed. It contains 36 cells and has been divided into 6 segments, each segment containing two 3-cell columns. Some cells display a random multiplier {1, 2, 3, 4, 5, 10, 15 or 50}. These cells are randomly selected. The number of cells that are filled with multipliers at the beginning of the bonus game is equal to the number of fire numbers selected at the beginning of the main game. During the bonus game, you see random multipliers (“cells’ multipliers”) spin into empty cells on the bonus game grid. If a segment is fully filled with multipliers, a special segment multiplier {x2, x3, x5} that is associated with that segment becomes available and multiplies all the multipliers in that segment’s cells. Some segments may be associated with a jackpot level. There are (4) jackpot levels in the bonus game, granting different multipliers: Mini x20, Minor: x100, Major: x500 and Grand: x2,000. If a segment is fully filled with multipliers, the Jackpot level is revealed, and the jackpot multiplier is added to the bonus game’s Total Multiplier. It does not boost the cells multipliers in the associated segment.

By default, the bonus game lasts 3 spins and after each spin, one spin is deducted from the count. However, every time an empty cell is filled with a multiplier, the Spins left count is reset to 3 spins. Bonus game ends when there are no more spins left or all the cells have been filled with multipliers.

## Paytables

### Mega Fire Blaze Roulette Live Paytable and Bonus Eligibility

Wager	Numbers Covered	Pay	Bonus Eligibility
