

### **Nexus Command**

## **RULES OF PLAY:**

1. TriLux BlackJack offers an optional progressive wager.
2. All percentage and odds pays consider the player's initial two cards, and dealer's up-card only.
3. Paytables are listed separately
4. The meter will be reseeded when the 100% award hits. The cost of the reseed has been factored into the casino's mathematical advantage.
5. To begin each round, players must make their regular game's wager. They may optionally place any of the offered bonus and progressive wagers. Players must place the progressive wagers on the sensor in front of their betting position. The sensor will light up.
6. Once all players place their bets, the dealer will press "START GAME" on the keypad. The sensors will then light up, indicating a progressive wager. The dealer will leave all progressive bets on the table.
7. The dealer then follows house procedures for dispensing the starting cards to all participating players and themself.
8. After each participating player has received their first two starting cards and the dealer has revealed their up-card, the progressive wagers can be resolved. The

dealer will follow the procedure in the next section for reconciling percentage pays from the progressive meter.

9. Progressive winners:
  - a. The percentage pays are paid from the progressive jackpot shown on the progressive meter. Note: Fixed pay awards are paid from the tray; they do not come off the meter.
  - b. In the event more than one progressive meter pay hits during the same round, the dealer will first pay the player farthest on the right and then move counterclockwise to pay other players. As regulatory procedures permit, this policy can be replaced by casino internal controls.
  - c. When a player has a progressive winner, the dealer will select the player spot corresponding to the player with the winning progressive hand. The dealer will then press the appropriate hand button on the display. (If the hand button is pressed by accident, pressing it again will turn it off.)
  - d. The dealer shall then contact a supervisor.
  - e. Once the casino verifies the progressive win, the supervisor will press the confirm button. To complete the action, a Supervisor or Executive card (depending on jackpot level) swipe is required. This records the win onto the Game Manager computer and adjusts the meter appropriately for the prize won. House procedures are then followed for paying the prize. (Reviewing the monitor connected to the Game Manager will show the prize amount to be paid and pressing the “money bag” icon will print a win page, which can be used to help record the payout for accounting.)
  - f. Once the dealer has reconciled all action, they press “END GAME.” This resets the system to begin the next hand.
  - g. Once the Supervisor or Executive card (depending on jackpot level) is swiped the prize is logged into Game Manager. If the progressive pay needs to be backed out at this point, the award will need to be manually backed out using the Game Manager manual adjustment feature.
10. Once the progressive wagers have been resolved and the dealer has pressed “END GAME” standard blackjack can resume per house rules.
